

The International Construction & Utility Equipment Exposition (ICUEE ) is scheduled for October 3-5 at the Kentucky Exposition Center in Louisville, Kentucky. ICUEE includes more than 25 acres of indoor and outdoor exhibits and product demonstrations. *Modern Contractor Solutions* will be set up in Booth # 3902 throughout the show ... so stop by to meet the crew. We'd love to talk shop with you! While touring the show, check out these must-see exhibitors:

American Pneumatic Tool generators are purpose-built for quick, easy, and safe transportation and on-site handling. Built to last, an APT generator will provide years of dependable service for your electrical power generation needs. Built from the insights gained from industrial customers, rental companies, public utilities, and other end users, APT Generators are designed to withstand the most demanding on-site conditions and environments.

- Sound-attenuated, rugged steel enclosure
- Large doors and access for superior serviceability
- Single point lifting beam
- Trailer or skid configuration available

The R35Z-9A zero-tail swing excavator is among the models Hyundai Construction Equipment Americas will feature at ICUEE. Standard features include thumb bracket, large dozer blade, hydraulic quick-coupler for attachments, and hydraulics-ready auxiliary piping. Boom swing enables the operator to offset the boom 75 degrees left and 50 degrees right, enabling close work alongside foundations and in congested areas.

Morooka USA is the only rubber-track carrier manufacturer to design and build a complete line of carriers dedicated to the utility industry. The full-line of new Morooka models for the utility industry (underground and overhead) will be on display at ICUEE in Louisville. Manufactured at Morooka's Virginia facilities, the carriers offer high value beginning with competitive pricing and coast-to-coast product support, since all models are U.S. built and powered by Caterpillar and Kubota engines. Morooka carriers can be fitted out as personnel or tool carriers, among many other options.

Towmaster's® T-series large drop-deck trailer is designed for hauling heavier mid-size equipment. Ranging from 14,000 to 20,000 lb. capacities, it is built on a stout cold-formed I-beam tongue and main frame. The oak wood deck is supported by strong 3-inch I-beam crossmembers. Dexter® Torflex® rubber torsion axles give it a smooth ride making the Towmaster trailer easy to pull. Several options and configurations are available, like this utility model that features a beavertail, adjustable spring-assist ramps able to be mounted toward one side, plenty of deck space for racking, lockable tool tray, bolt-on parking jack, electric brakes and LED lights.
